

ACOUSTICS OF BOILING WITH UNDERHEATING ON A LASER HEATING ELEMENT

M.S. Lebedev, A.A. Tagil'cev, A.V. Kulik, V.M. Chudnovskij

We study acoustic signals arising during cavitation initiated by laser heating of water in the vicinity of the end of an optical fiber immersed in water. It is shown that the growth and collapse of the vapor phase in the vicinity of the end of the optical fiber (laser heating element), along which laser radiation propagates, generate acoustic signals characteristic of the elementary act of boiling, which precede the appearance of large-amplitude signals. It has been established that large amplitude signals are caused by shock waves that arise during the collapse of the main bubble and secondary bubbles - "rebounds".

Keywords: cavitation, vapor bubbles, laser radiation, heating, boiling, sound pulse, acoustic vibrations, shock waves

Information about the authors

LEBEDEV Mihail Sergeevich, Ph.D., junior researcher
Institute of Applied Mathematics, Far Eastern Branch of the
Russian Academy of Sciences

Work address: 690041, Vladivostok, st. Radio, 7

Research Interests: hydroacoustics, correlation and spectral analysis

E-mail: lebedevms@poi.dvo.ru

Phone: +7(423) 231-14-00

ORCID: 0000-0002-6859-2001

TAGIL'CEV Aleksandr Anatol'evich, candidate of technical sciences, associate professor, senior researcher
Institute of Applied Mathematics, Far Eastern Branch of the
Russian Academy of Sciences

Work address: 690041, Vladivostok, st. Radio, 7

Research Interests: hydroacoustic antennas and transducers, acoustic measurements

E-mail: atagiltcev@poi.dvo.ru

Phone: +7(423) 231-14-00

ORCID: 0000-0001-9207-4418

KULIK Aleksandr Valer'evich, research engineer
Institute of Applied Mathematics, Far Eastern Branch of the
Russian Academy of Sciences

Work address: 690041, Vladivostok, st. Radio, 7

Research Interests: energy, cavitation, optics

E-mail: kulik_av@dvfu.ru

Phone: +7 (423) 231-18-50

ORCID: 0009-0000-5027-5713

CHUDNOVSKIJ Vladimir Mihajlovich, Doctor of Biological Sciences, Chief Researcher
Institute of Applied Mathematics, Far Eastern Branch of the
Russian Academy of Sciences

Work address: 690041, Vladivostok, st. Radio, 7

Research Interests: laser biophysics, cavitation, hydrodynamics
