

A TESTING FLOOR FOR SEDIMENT SAMPLERS

A.N. Kolesnik, A.A. Bosin, O.N. Kolesnik, Ye.A. Yanchenko

A brief characteristic of a testing floor organized at the POI FEB RAS (Vladivostok) for checking, repairing and upgrading equipment specializing in sampling bottom sediments, as well as for conducting relevant demonstration and training programs is given. Recommended for marine scientific, scientific-production organizations and educational institutions of Russia.

Keywords: testing floor, bottom sediments, sediment samplers, marine expeditions, accidents prevention, training, marine geology, oceanography

Information about the authors

KOLESNIK Aleksandr Nikolayevich, Candidate of Geology and Mineralogy, Senior Researcher

V.I. Il'ichev Pacific Oceanological Institute FEB RAS

Address: 43 Baltiyskaya St., Vladivostok 690041

Research interests: marine geology, lithology, geochemistry, mathematical statistics, paleoceanography, Pleistocene, Holocene

E-mail: kolesnik_a@poi.dvo.ru

ORCID: 0000-0001-6258-9859

BOSIN Aleksandr Anatol'yevich, Candidate of Geography, Leading Researcher

V.I. Il'ichev Pacific Oceanological Institute FEB RAS

Address: 43 Baltiyskaya St., Vladivostok 690041

Research interests: marine geology, climate changes, paleoproduction, Holocene, Late Pleistocene, stratigraphy, NW Pacific

E-mail: bosin@poi.dvo.ru

ORCID: 0000-0002-3994-2623

KOLESNIK Ol'ga Nikolayevna, Candidate of Geology and Mineralogy, Senior Researcher

V.I. Il'ichev Pacific Oceanological Institute FEB RAS

Address: 43 Baltiyskaya St., Vladivostok 690041

Research interests: marine geology, bottom sediments, rocks, ores, metals

E-mail: kolesnik_o@poi.dvo.ru

ORCID: 0000-0002-2898-8503

YANCHENKO Yelena Aleksandrovna, Candidate of Geology and Mineralogy, Researcher

V.I. Il'ichev Pacific Oceanological Institute FEB RAS

Address: 43 Baltiyskaya St., Vladivostok 690041

Research interests: marine geology, bottom sediments, microfossils, biostratigraphy, paleoceanography
